

REVIEW OF THE ACADEMIC ADVISER

to the final qualifying work of the 4–th year student

Saint–Petersburg State University

VIKTOROVA Anna Romanovna,

created on the topic

«Neural network analysis of the enterprise financial stability»

Viktorova Anna Romanovna was trained at the department of modeling of socio–economic systems from December 2018 to May 2019. During this short period she showed herself to be a student interested in scientific growth.

Anna Romanovna studied the scientific publications of domestic and foreign experts in applied mathematics in the course of the solution tasks set and deeply mastered the topic of research. Focusing on the topic of predicting bankruptcy of an enterprise, she proposed a fairly simple and effective IT–solution to this problem.

According to the results of the work carried out 3 publications.

The obvious advantage of the FQW Viktorova Anna Romanovna — the relevance of the research topic and the quality of the results.

The final qualifying work meets the requirements of the bachelor's FQW and deserves the mark “**excellent**”, and Viktorova A.R. —bachelor degree.
